2 Background

About BEE

The Government of India set up Bureau of Energy Efficiency (BEE) on 1st March 2002 under the provisions of the Energy Conservation Act, 2001. The mission of the Bureau of Energy Efficiency is to assist in developing policies and strategies with a thrust on self-regulation and market principles, within the overall framework of the Energy Conservation Act, 2001 with the primary objective of reducing energy intensity of the Indian economy.

2.1 Extant Regulations and role of BEE

Energy Accounting:

Energy Accounting means accounting of all energy inflows at various voltage levels in the distribution periphery of the network, including renewable energy generation and open access consumers, and energy consumption by the end consumers. Energy accounting and a consequent annual energy audit would help to identify areas of high loss and pilferage, and thereafter focus efforts to take corrective action.

Bureau of Energy Efficiency (BEE) through Ministry of Power, Government of India issued regulations namely Bureau of Energy Efficiency (Manner and Intervals for Conduct of Energy Audit in electricity distribution companies) Regulations, 2021 (hereinafter referred as 'BEE EA Regulation 2021'), for Conduct of Mandatory Annual Energy Audit and Periodic Energy Accounting in DISCOMs. As per the said regulation, all Electricity Distribution Companies are mandated to conduct annual energy audit and periodic energy accounting on quarterly basis. These Regulations for Energy audit in Electricity Distribution Companies provides broad framework for conduct of Annual Energy Audit though and Quarterly Periodic Energy Accounting with necessary Pre-requisites and reporting requirements to be met.

Role of BEE include:

- i. Create awareness and disseminate information on energy efficiency and conservation
- ii. Arrange and organize training of personnel and specialists in the techniques for efficient use of energy and its conservation
- iii. Strengthen consultancy services in the field of energy conservation
- iv. Promote research and development
- v. Develop testing and certification procedures and promote testing facilities
- vi. Formulate and facilitate implementation of pilot projects and demonstration projects
- vii. Promote use of energy efficient processes, equipment, devices and systems
- viii. Take steps to encourage preferential treatment for use of energy efficient equipment or appliances
- ix. Promote innovative financing of energy efficiency projects
- x. Give financial assistance to institutions for promoting efficient use of energy and its conservation
- xi. Prepare educational curriculum on efficient use of energy and its conservation
- xii. Implement international co-operation programs relating to efficient use of energy

and its conservation

2.2 Purpose of audit and accounting Report

Owing to the impact of energy auditing on the entire distribution and retail supply business and absence of an existing framework with dedicated focus on the same, it was imperative to develop a set of comprehensive guidelines that all Distribution utilities across India can follow and adhere to.

2.3 Period of Energy Auditing and Accounting

Bureau of Energy Efficiency (BEE) through Ministry of Power, Government of India issued regulations for Conduct of Mandatory Annual Energy Audit and Periodic Energy Accounting in DISCOMs. As per the regulation, all Electricity Distribution Companies are mandated to conduct annual energy audit and periodic energy accounting on quarterly basis.

Regulations on Manner and Intervals for Conduct of Energy Audit and Accounting in Electricity Distribution Companies has been framed. Energy Accounting means accounting of all energy inflows at various voltage levels in the distribution periphery of the network, including renewable energy generation and open access consumers, and energy consumption by the end consumers. Energy accounting and a consequent annual energy audit would help to identify areas of high loss and pilferage, and thereafter focus efforts to take corrective action.

These Regulations for Energy audit in Electricity Distribution Companies provides broad framework for conduct of Annual Energy Audit though and Quarterly Periodic Energy Accounting with necessary Pre-requisites and reporting requirements to be met.

3.3.8 Salient Features

Maximum Demand has increased from 723MW in 2020-21 to 971 MW in 2024-25. Capacity of Receiving Substation increased from 2283 MVA in 2020-21 to 2361 MVA in 2024-25. Distribution Sub-station capacity is increased from 2682 MVA in 2020-21 to 2926 MVA in 2024-25.

Total 38983 requisitions including SIMHA (hutment/slum area) were received during the year 2024-25 out of which around 36829 meters was provided to various consumer.

The Distribution loss is 4.64% only which level below the targeted values of 12% to 15 % of the regulation published by BEE.

In the year, 2024-2025 total 113295 recalcitrant consumers were disconnected for non- payment of electricity bills/security deposit amount and non-recovery of payment due to dishonored cheques etc.

All underground EHV, HV & LV cable network data including RSS/DSS & consumer service cables are maintained in digitized plan by using G. Tech 9.3.2 software since 2009 under digitization project. Previously it was maintained manually which requires lot of effort, time-consuming work & all data cannot be extracted at instantly.

Including substation supporting cable network related plan such as site plan, layout plan, mains plan & service cable related information are prepared in AutoCAD software which is a part of digitization project.

This outdated software & useful life completed hardware is going to be replaced with ESRI platform for making it in line with MCGM platform, so that the purpose of 'One MCGM GIS' can be achieved. Upgraded software will make the GIS system scalable to achieve aim of proposed integration with other inter related system. In regards, to provide required GIS 10.8.1 Arc FM 10.8.1D and necessary services like geo-referencing, data integration data up-gradation, training etc to BEST at the cost of MCGM is underway.

3.4 Energy Conservation Schemes

1. The Smart Meter installation work includes 1,255 feeder meters, of which 919 have already been installed, and the remaining are work in progress.
2. For DSS works, the scope covers installation of 666 Distribution Transformers, with 49 already installed, contributing to a capacity enhancement of 0.89 MVA.
3. The scheme includes various activities such as the replacement of 20 power transformers, the replacement of 253 kilometers of underground cables of various sizes, and the replacement of 666 distribution transformers (DTr). Additionally, it involves upgrading 396 units from 11 kV oil circuit breakers (OCB) to vacuum circuit breakers (VCB) and installing 199 units of 11 kV ring main units (RMU). Furthermore, the scheme incorporates SCADA (Supervisory Control and Data Acquisition), DMS (Distribution Management System), and OMS (Outage Management System) initiatives, as well as the implementation of ERP (Enterprise Resource Planning) and MBC (Metering and Billing Compliance) systems with a customer call center.
4. The RDSS initiative has implemented the replacement of auxiliary components for consumer metering of 450000 Nos.
5. The total count of consumers utilizing 'smart' meters stands at 308793.

5.3 Energy Accounts and performance in the Current Year

5.3.1 Voltage wise assessed loss of BEST

Metering is an inevitable part of the Power Distribution network for evaluating the energy injected and transferred to end consumers. Meter readings are the only way to evaluate the accurate energy balance of the system. Faulty meters, Nonworking meters mislead the losses statement. To evaluate the metering system of the BEST, auditors have physically visited the sample grid and inspected the meter working conditions.

5.4 Subsidy computation and analysis (based on quarterly data)-There are no subsidized consumer in the BEST Area of supply.

5.4.1 Identification of key exceptions

The 11kV meters at the substation shall be installed as energy accounting is carried out based on the input energy and the energy billed at the meter consumer end. In order to comply with the regulation, the metering is mandatory at 11kV feeders originating from BEST Substation. Hence the installation of smart meter, network segment wise & at consumer end is in process. Also, software development for Meter Data Management is in process. After implementation of this system energy accounting will be possible without manual interference.

6 Energy Audit Findings

6.1 Review of capacity of DISCOM's energy accounting and audit Cell-

- As per the regulation, the Energy Manager is appointed for preparation of the energy accounting, the team of Electrical Engg looks after the data compilation.
- It is proposed to appoint the IT manager and Finance manager on board of the Discom as per regulation
- Audit is performed from Input point (Discom periphery) to last mile level. Installations of the meters as per the regulation are in process on the 11kV distribution network. However, supply system found as Ring Main Unit system but operations are radially.

6.2 Critical Network Analysis

- All Distribution transformers shall be metered with communicable meters. Presently BEST has started installation of SMART DT metering in 33KV/11KV/415V voltage level. Also, software development for Meter Data Management is in process. After implementation of MDM system energy accounting will be possible without manual interference.

6.3 Summary of Management response to Auditors comments

1. The Energy Auditor highlighted that, the software systems are old and needs to be replaced.

Management Reply:

This outdated software & useful life completed hardware is going to be replaced with ESRI platform for making it in line with MCGM platform, so that the purpose of 'One MCGM GIS' can be achieved. Upgraded software will make the GIS system scalable to achieve aim of proposed integration with other inter related system. In regards, to provide required GIS 10.8.1 Arc FM 10.8.1D and necessary services like geo-referencing, data integration data up-gradation, training etc, to BEST at the cost of MCGM is underway.

2. What are the efforts you are doing to stop the energy PILFERAGE? Management Reply:

During the year 2024-25 Vigilance Department detected 139 measure theft cases where loss of revenue was more than Rs. 1 Lakh. Out of this 139 nos. of cases an amount of Rs.2,40,81,103/- have been recovered. Also, during the year Vigilance Department conducted 19 nos. mass raids in South area and 494 mass raids in North area, where a claim of Rs.3,27,63,854/- have been prepared and Rs.1,48,50,644/- have been recovered

6.3.3 AT&C Losses Computation in BEST

Total unit received is computed from the actual meter readings of the interface meter installed at various locations in the system. The units billed are calculated as actual billed to various categories of the consumers.

Determination of Aggregate Technical and Commercial losses (AT&C) involve calculation of Distribution Loss (%) as difference between input energy and units billed.

Where D loss: $(UI - UB) / UI \%$

UI: Units Input (excluding units traded)

UB: Units Billed (to consumers in its licensed area)

- Billing Efficiency = 1- D Loss
- Collection efficiency as the ratio of amount collected to amount billed.
- AT&C loss as difference between units input and units realized.

AT & C Loss: $[1 - \text{Billing Efficiency} \times \text{Collection Efficiency}] \times 100\%$

BEST consumers are billed 100% and hence no inclusions and exclusions are made in the report.

7 Conclusion and Action plan

7.1 Summary of Critical Analysis

The energy metering is only at Input End- Best periphery and at the Consumer end. The Strategic level metering is not working at all; hence it is imminent to install the meters at 11kV/33kV level and at DTR level in order to comply with the regulation. Installation of SMART meter at consumer as well as at Feeder & DT is in process. The process of the meter installation and DTR Capacity enhancement is enclosed in the below table.

Measure Project Name	Description	Status (Implemented/ Planned)	Remarks
Feeder Metering Improvement	Installation of Communicable meters	The Smart Meter installation work includes 1,255 feeder meters, of which 919 have already been installed, and the remaining are Work in Progress (WIP).
